**Protection against oxidation:** the antenna is designed to be able to withstand the worst climatic conditions and so that the oxidation of its parts is prevented: the nuts and screws are made of stainless steel, whereas the plastic parts are made of raw materials resistant to external environmental agents.

**Protection against accidental hits:** The antenna is designed making sure persons are protected from accidental hits against its projecting parts: the whip is equipped with appropriate plastic bumpers.

**RoHS directive (2002-95-CE):** The antenna is RoHS compliant.

#### MOUNTING INSTRUCTIONS:

Please mount the antenna on the box using a proper fitting or screw.

It is recommended to add an O-ring in the suitable seat, located under the plastic base of the antenna.

#### WARNING:

For a correct installation, please mount the antenna on a metallic box (or on any equivalent electromagnetic device) so that the whip is at least 5 cm apart from any metallic object and so that it is visible from the area in which the remote control is to be used.
